Every Time

Welcome to the future of home extensions

hup! is the revolutionary new way to extend your home and create beautiful, bright living spaces quickly, with minimal disruption to your home and family.

A building revolution

A building revolution, hup! uses highly energy efficient Ultrapanel in place of traditional brick walls and timber roofs. These groundbreaking panels make hup! extensions five times more energy efficient than the average UK home so that even with plenty of glass, your hup! will be every bit as warm as the rest of your home. This advanced technology also means that hup! extensions can be built five times faster than a brick extension.

Proudly British, hup! extensions are manufactured off-site in our state-of-the-art factory. Work which would usually take several months with a traditionally built extension has already been done when your hup! arrives at your home. Your skilled hup! builder will then build your new extension – usually in a matter of days.

Along with being ideal for extensions, hup! is also a fantastic choice for conservatories and conservatory transformations, as well as garden homes.

“

hup! as recommended by Laura Jane Clark.

“For homeowners, hup! is completely game changing. People often ask how they can add an extension or rebuild their unusable conservatory in the most efficient way possible - hup! is definitely the answer.”

The better way to build

There are many reasons why hup! is the better way to build. Forget horror stories of lengthy builds, mess and disruption to your home, and budgets spiralling out of control – with hup! all of these are eliminated.

A revolution in extension and conservatory construction

Ultimate Design Flexibility

- Vaulted, sloped or flat ceilings
- Five Ultraframe roof systems
- Any wall finish, including brick, render or cedar
- Windows and doors anywhere, any style, any shape
- Unrivalled choice of rooflights

Five Times More Energy Efficient

- Keep energy bills low
- Lower emissions
- Zero waste production methods
- Increased comfort indoors

Five Times Faster To Build

- Save weeks or months off build times
- Rapid connection technology
- Build in any weather
- Less mess and disruption

High Quality Finish Every Time

- Designed with advanced manufacturing software
- Built by a trained and experienced hup! build team
- Made to measure components for a perfect build, every time

One Supplier, One Project

- Fully project managed for you
- No need for an architect
- No need for independent structural calculations
- Reliable timelines
- Cost certainty and clear pricing

Kind to the Planet

- 60% more carbon efficient to manufacture vs brick
- Zero waste in production and on site
- Re-use basework
- ISO 140001 Environmental Management Accredited
- Lower ongoing energy usage - less emissions

Conservatories

As energy efficient as an extension

Flood your home with healthy natural light, safe in the knowledge that high performance glazing will make it as energy efficient as it is bright. Not only does this specialist glazing enhance the warmth of your home, but its properties also prevent any overheating and furniture fading in the room below. Every hup! conservatory is constructed from materials that meet the latest Building Regulations standards for extensions.

The insulated internal pelmet in your conservatory, high performance roof glass and super-insulated walls ensure that your hup! conservatory will be as energy efficient as any modern extension.

Conservatory Transformations

Extension-like conservatory upgrades

If you have ambitions for your old conservatory, then hup! is the simple solution. Within a matter of weeks, hup! can transform an old conservatory into a modern, energy efficient extension that feels like it is now part of your home. hup!'s lightweight, energy efficient walls are quick, easy, and cost effective to build onto existing bases.

Upgrade to a high performance glass roof, or choose a super-insulated solid roof with rooflights to transform the thermal performance of your conservatory and still keep the natural light in any adjoining rooms.

With super-insulated walls, your new hup! will be energy efficient enough to turn your old conservatory into a modern open plan extension by removing internal doors and opening the space up to the rooms beyond.

Extensions

Five times faster than traditional methods

Are you dreaming of a bright sociable open plan room that links your living space with the garden? Maybe you're building a new home office or playroom filled with healthy and stimulating natural light to create the perfect learning or working environment?

With hup! the only limit is your imagination and every hup! roof comes with high performance glass rooflights to fill your new room with plenty of natural light.

Extending your home with hup! is both simple and fast too. There's no need to feel overwhelmed at the prospect of managing architects, builders and various trades, and no need to worry about going over budget.

As well as home extensions, hup! is also the ideal choice for building a garden home for family members who require their own living space in the privacy of the garden, with all the comfort of the home.
